|---|---|--|--|
| | Concrete | Pictorial | Abstract |
| Year 5 Addition Column addition with whole numbers | Use place value equipment to represent additions. Add a row of counters onto the place value grid to show 15,735 + 4,012. | Represent additions, using place value equipment on a place value grid alongside written methods. TTh Th H T O O O O O O O O O O O O O O O O O O | Use column addition, including exchanges. TTh Th |
| Representing additions | | Bar models represent addition of two or more numbers in the context of problem solving. $ \begin{array}{c ccccccccccccccccccccccccccccccccccc$ | Use approximation to check whether answers are reasonable. TTh Th H T O 2 3 4 0 5 + 7 8 9 2 + 7 8 9 2 3 1 2 9 7 |
| Adding tenths | Link measure with addition of decimals. Two lengths of fencing are 0.6 m and 0.2 m. How long are they when added together? 0.6 m 0.2 m | Use a bar model with a number line 0.6 m 0.2 m 0.1 m 0 | Understand the link with adding fractions. $\frac{6}{10} + \frac{2}{10} = \frac{8}{10}$ $6 \text{ tenths} + 2 \text{ tenths} = 8 \text{ tenths}$ $0.6 + 0.2 = 0.8$ |

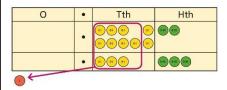

Adding decimals using column addition

Use place value equipment to represent additions.

Show 0.23 + 0.45 using place value counters.

Use place value equipment on a place value grid to represent additions.

Represent exchange where necessary.

O · Tth Hth 0 - 9 2 + 0 · 3 3 1 · 2 5

Include examples where the numbers of decimal places are different.

| 0 | • | Tth | Hth |
|-------|---|---------|-----------------|
| 00000 | • | | |
| 0 | • | (H) (H) | 000 000 000 000 |

⁵ ⁰ ⁰ 3.4 + 0.65 = ? + 1 · 2 5

Add using a column method, ensuring that children understand the link with place value.

Include exchange where required, alongside an understanding of place value.

$$\begin{array}{c|cccc}
O & \cdot & \text{Tth Hth} \\
\hline
0 & \cdot & 9 & 2 \\
+ & 0 & \cdot & 3 & 3 \\
\hline
1 & \cdot & 2 & 5 \\
\end{array}$$

Include additions where the numbers of O . Tth Hth decimal places are different.

Year 5 Subtraction

Column subtraction with whole numbers

Use place value equipment to understand where exchanges are required.

2.250 - 1.070

Represent the stages of the calculation using place value equipment on a grid alongside the calculation, including exchanges where required.

$$15,735 - 2,582 = 13,153$$

| 1 5 7 3 - 2 5 8 |
|---|
| - 2 5 8 |
| 19- |
| |
| Now subtract the IOs. Exchange I hundred for IO tens. |

Subtract the 100s, 1,000s and 10,000s.

Use an area model and then add the parts.

Use a column multiplication, including any required exchanges.

T O

8 0 4 0

2 0

Multiplying 2-digit numbers by 2-digit numbers

Partition one number into 10s and 1s, then add the parts.

$$23 \times 15 = ?$$

80 + 56 = 136

So. 8 × 17 = 136

 $3 \times 15 = 45$

There are 345 bottles of milk in total.

$$23 \times 15 = 345$$

Use an area model and add the parts.

$$28 \times 15 = ?$$

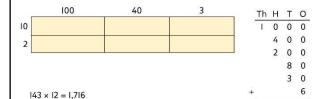

| | 20 m | 8 m | Н |
|------|---------------------------------|----------------------------|---|
| 10 m | 20 × 10 = 200 m ² | 8 × I0 = 80 m ² | 2 |
| 5 m | $20 \times 5 = 100 \text{ m}^2$ | 8 × 5 = 40 m ² | 4 |

Use column multiplication, ensuring understanding of place value at each stage.

Multiplying up to 4-digits by 2-digits

Use the area model then add the parts.

143 × 12 = 1,716

There are 1,716 boxes of cereal in total.

Use column multiplication, ensuring understanding of place value at each stage.

1716

Progress to include examples that require multiple exchanges as understanding, confidence and fluency build.

$$1,274 \times 32 = ?$$

First multiply 1,274 by 2.

Then multiply 1,274 by 30.

Finally, find the total.

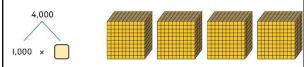

| МДІНЭ | | | |
|---|---|--|--|
| Multiplying decimals by 10, 100 and 1,000 | Use place value equipment to explore and understand the exchange of 10 tenths, 10 hundredths or 10 thousandths. | Represent multiplication by 10 as exchange on a place value grid. O The Hth Hth Good Good Good Good Good Good Good Goo | Understand how this exchange is represented on a place value chart. The Heat Tool Tthe 2 $\cdot 5 \times 10 = 25$ $2 \cdot 5 \times 100 = 250$ $2 \cdot 5 \times 1,000 = 2,500$ $2 \cdot 5 \times 1,000 = 2,500$ |
| Year 5 Division Understanding factors and prime numbers | Use equipment to explore the factors of a given number. 24 ÷ 3 = 8 24 ÷ 8 = 3 8 and 3 are factors of 24 because they divide 24 exactly. 24 ÷ 5 = 4 remainder 4. 5 is not a factor of 24 because there is a remainder. | Understand that prime numbers are numbers with exactly two factors. 13 ÷ 1 = 13 13 ÷ 2 = 6 r 1 13 ÷ 4 = 4 r 1 1 and 13 are the only factors of 13. 13 is a prime number. | Understand how to recognise prime and composite numbers. I know that 31 is a prime number because it can be divided by only 1 and itself without leaving a remainder. I know that 33 is not a prime number as it can be divided by 1, 3, 11 and 33. I know that 1 is not a prime number, as it has only 1 factor. |
| Understanding inverse operations and the link with multiplication, grouping and sharing | Use equipment to group and share and to explore the calculations that are present. I have 28 counters. I made 7 groups of 4. There are 28 in total. I have 28 in total. I shared them equally into 7 groups. There are 4 in each group. I have 28 in total. I made groups of 4. There are 7 equal groups. | Represent multiplicative relationships and explore the families of division facts. 60 ÷ 4 = 15 60 ÷ 15 = 4 | Represent the different multiplicative relationships to solve problems requiring inverse operations. 2 ÷ 3 = |

Dividing whole numbers by 10. 100 and 1,000

Use place value equipment to support unitising for division.

4.000 ÷ 1.000

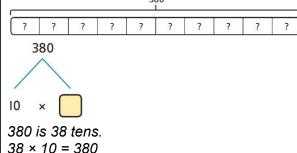

4.000 is 4 thousands.

So,
$$4,000 \div 1,000 = 4$$

Use a bar model to support dividing by unitising.

380 ÷ 10 = 38

Understand how and why the digits change on a place value grid when dividing by 10, 100 or 1.000.

| Th | Н | Т | 0 | |
|----|---|---|---|--|
| 3 | 2 | 0 | 0 | |

$$3.200 \div 100 = ?$$

3.200 is 3 thousands and 2 hundreds.

$$200 \div 100 = 2$$

 $3.000 \div 100 = 30$

$$3,200 \div 100 = 32$$

right.

Dividing by multiples of 10, 100 and 1,000

Use place value equipment to represent known facts and unitising.

15 ones put into groups of 3 ones. There are 5 groups.

$$15 \div 3 = 5$$

15 tens put into groups of 3 tens. There are 5 groups.

$$150 \div 30 = 5$$

Represent related facts with place value equipment when dividing by unitising.

180 is 18 tens.

 $10 \times 38 = 380$

So, $380 \div 10 = 38$

18 tens divided into groups of 3 tens. There are 6 groups.

12 ones divided into groups of 4. There are 3 aroups.

12 hundreds divided into groups of 4 hundreds. There are 3 groups.

$$1200 \div 400 = 3$$

Reason from known facts, based on understanding of unitising. Use knowledge of the inverse relationship to check.

So, the digits will move two places to the

$$3,000 \div 5 = 600$$

 $3,000 \div 50 = 60$

$$3,000 \div 500 = 6$$

$$5 \times 600 = 3,000$$

$$50 \times 60 = 3,000$$

 $500 \times 6 = 3,000$

Dividing up to four digits by a single digit using short division

Explore grouping using place value equipment.

 $268 \div 2 = ?$

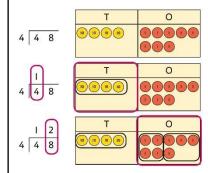

There is 1 group of 2 hundreds. There are 3 groups of 2 tens. There are 4 groups of 2 ones.

 $264 \div 2 = 134$

Use place value equipment on a place value grid alongside short division.

The model uses grouping.

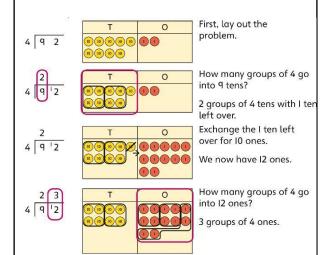

A sharing model can also be used, although the model would need adapting.

Lay out the problem as a short division.

There is 1 group of 4 in 4 tens. There are 2 groups of 4 in 8 ones.

Work with divisions that require exchange.

Use short division for up to 4-digit numbers divided by a single digit.

$$3.892 \div 7 = 556$$

Use multiplication to check.

$$556 \times 7 = ?$$

$$6 \times 7 = 42$$

 $50 \times 7 = 350$
 $500 \times 7 = 3500$

$$3.500 + 350 + 42 = 3.892$$

Understanding remainders

Understand remainders using concrete versions of a problem.

80 cakes divided into trays of 6.

80 cakes in total. They make 13 groups of 6, with 2 remaining.

Use short division and understand remainders as the last remaining 1s.

1 3 r 2 6 8 2 0

Lay out the problem as short division.

How many groups of 6 go into 8 tens?

There is I group of 6 tens.
There are 2 tens remaining.

How many groups of 6 go into 20 ones?

There are 3 groups of 6 ones.

There are 2 ones remaining

In problem solving contexts, represent divisions including remainders with a bar model.

$$683 = 136 \times 5 + 3$$

 $683 \div 5 = 136 \, r \, 3$

Dividing decimals by 10, 100 and 1,000

Understand division by 10 using exchange.

2 ones are 20 tenths.

20 tenths divided by 10 is 2 tenths.

Represent division using exchange on a place value grid.

Hth

| • | | |
|----|----------|-------------------------|

1.5 is 1 one and 5 tenths.

This is equivalent to 10 tenths and 50 hundredths.

10 tenths divided by 10 is 1 tenth. 50 hundredths divided by 10 is 5 hundredths.

1.5 divided by 10 is 1 tenth and 5 hundredths.

 $1.5 \div 10 = 0.15$

Understand the movement of digits on a place value grid.

$$0.85 \div 10 = 0.085$$

| 0 | • | Tth | Hth | Thth |
|----|---|-----|-----|------|
| 8_ | • | 5 _ | / | |
| 0 | • | 0 | →8 | →5 |

$$8.5 \div 100 = 0.085$$

Understanding the relationship between fractions and division Use sharing to explore the link between fractions and division.

1 whole shared between 3 people. Each person receives one-third.

Concrete

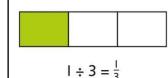

mental methods.

Use a bar model and other fraction representations to show the link between fractions and division.

Use the link between division and fractions to calculate divisions.

$$5 \div 4 = \frac{5}{4} = 1\frac{1}{4}$$

$$11 \div 4 = \frac{11}{4} = 2\frac{3}{4}$$

Year 6

Year 6 Addition

Comparing and selecting efficient methods

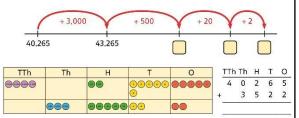

Represent 7-digit numbers on a place value grid, and use this to support thinking and

| М | HTh | TTh | Th | Н | Т | 0 |
|---|------|-----|----|-----|---|---|
| • | •••• | • | | ••• | | • |

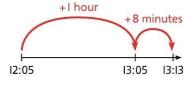

Pictorial

Discuss similarities and differences between methods, and choose efficient methods based on the specific calculation.

Compare written and mental methods alongside place value representations.

Use bar model and number line representations to model addition in problem-solving and measure contexts.

Abstract

Use column addition where mental methods are not efficient. Recognise common errors with column addition.

| TTh | Th | Н | Т | 0 |
|-----|----------|-------------------|--------------|------------------|
| 3 | 2 | I | 4 | 5 |
| | 4 | 3 | 0 | 2 |
| 3 | 6 | 4 | 4 | 7 |
| | TTh 3 | TTh Th 3 2 4 3 6 | 3 2 I 4 3 | 3 2 I 4 4 3 0 |

Which method has been completed accurately?

What mistake has been made?

Column methods are also used for decimal additions where mental methods are not efficient.

Selecting mental methods for larger numbers where appropriate

Represent 7-digit numbers on a place value grid, and use this to support thinking and mental methods.

| M | HTh | TTh | Th | Н | T | 0 |
|----|------|-----|----|-----|---|---|
| •• | •••• | • | • | ••• | | • |

2,411,301 + 500,000 = ?

This would be 5 more counters in the HTh place.

So, the total is 2,911,301.

2,411,301 + 500,000 = 2,911,301

Use a bar model to support thinking in addition problems.

I added 100 thousands then subtracted 1 thousand.

257 thousands + 100 thousands = 357 thousands

So, 257,000 + 99,000 = 356,000

Use place value and unitising to support mental calculations with larger numbers.

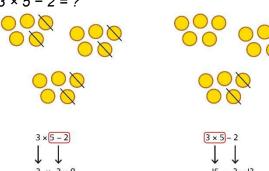

$$195 + 5 + 1 = 201$$

195 thousands + 6 thousands = 201 thousands

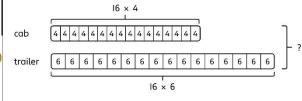

Understanding order of operations in calculations

Use equipment to model different interpretations of a calculation with more than one operation. Explore different results.

$$3 \times 5 - 2 = ?$$

Model calculations using a bar model to demonstrate the correct order of operations in multi-step calculations.

This can be written as: $16 \times 4 + 16 \times 6$ $16 \times 4 + 16 \times 6$ 64 + 96 = 160

Understand the correct order of operations in calculations without brackets.

Understand how brackets affect the order of operations in a calculation.

$$4 + 6 \times 16$$

 $4 + 96 = 100$

$$(4+6) \times 16$$

10 × 16 = 160

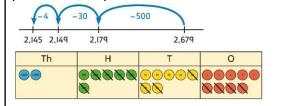

Year 6 Subtraction

Comparing and selecting efficient methods

Use counters on a place value grid to represent subtractions of larger numbers.

| Th | Н | Т | 0 |
|----|---|-------|-------------|
| | | 0000X | <i>8888</i> |

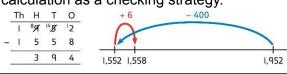

Compare subtraction methods alongside place value representations.

Compare and select methods.

Use column subtraction when mental methods are not efficient.

Use two different methods for one calculation as a checking strategy.

| | | Th H T O 2 6 7 9 - 5 3 4 2 1 4 5 Use a bar model to represent calculations, including 'find the difference' with two bars as comparison. computer game puzzle book fig. 50 | Use column subtraction for decimal problems, including in the context of measure. Dividing by a 2-digit number using long division Use equipment to build numbers from groups.

182 divided into groups of 13. There are 14 groups.

Use an area model alongside written division to model the process.

$$377 \div 13 = 29$$

Use long division where factors are not useful (for example, when dividing by a 2-digit prime number).

Write the required multiples to support the division process.

$$377 \div 13 = 29$$

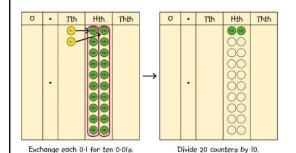

A slightly different layout may be used, with the division completed above rather than at the side.

Divisions with a remainder explored in problem-solving contexts.

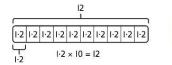

Dividing by 10, 100 and 1,000

Use place value equipment to explore division as exchange.

0.2 is 2 tenths.

2 tenths is equivalent to 20 hundredths. 20 hundredths divided by 10 is 2 hundredths. Represent division to show the relationship with multiplication. Understand the effect of dividing by 10, 100 and 1,000 on the digits on a place value grid.

Understand how to divide using division by 10, 100 and 1,000.

Use knowledge of factors to divide by multiples of 10, 100 and 1,000.

$$40 \longrightarrow \begin{array}{c} \div 10 \\ \hline \end{array} \longrightarrow \begin{array}{c} \div 5 \\ \hline \end{array} \longrightarrow ?$$

$$40 \longrightarrow \begin{array}{c} \div 5 \\ \hline \end{array} \longrightarrow \begin{array}{c} \div 10 \\ \hline \end{array} \longrightarrow ?$$

$$40 \div 5 = 8$$

 $8 \div 10 = 0.8$

O • Tth Hth

So,
$$40 \div 50 = 0.8$$

Dividing decimals

Use place value equipment to explore division of decimals.

8 tenths divided into 4 groups. 2 tenths in each group.

Use a bar model to represent divisions.

| | 0.8 | | | | |
|-------------|---------|-------|-----------|--|--|
| ? | ? | ? | ? | | |
| 4 × 2 = 8 | | 8 ÷ 4 | 4 = 2 | | |
| So, 4 × 0·2 | ? = 0·8 | 0.8 | ÷ 4 = 0·2 | | |

Use short division to divide decimals with up to 2 decimal places.
